Financial Section

Dear Shareholders,

I am happy to share with you, through this 25th Annual Report of your company, developments that have taken place, which I strongly believe will aid the growth of the company both in the short and long term periods. These developments relate to important additions to customer list, acceptance of your company's products in the market place and certain policy initiatives of the Government of India which are designed to encourage indigenous development and manufacture of Electronics Hardware and investments on infrastructure for the manufacture of state-of-the-art Electronic Hardware.

As I have mentioned in my earlier statement, we are trying to consolidate on the products already developed and increase our market shares through proven products in carefully selected market segments with an intense focus.

LED Lighting Products

Your company succeeded in obtaining a fairly large order for the supply and maintenance of street lights in one of the Districts of the Maharashtra State. Your company also succeeded in forging an alliance with Energy Efficiency Services Limited (EESL) for joint execution of the project. EESL is an organization promoted by a few Government of India Enterprises for promoting energy efficient appliances and deployment of Non-conventional sources of energy. Their areas of interest include Illumination applications and Conservation of Energy. It is expected that successful execution of this mega order not only will improve the top and bottom lines of your company but also will lead to obtaining similar business opportunities in other parts of the country.

ESCO Models have come to stay in the execution of large capital intensive projects which offer sustainable energy savings in the lighting segment. Your company's success in obtaining the prestigious order from the State of Maharashtra, therefore assumes a Very happy Significance. This will certainly be a niche segment of focus for your company.

You will be gratified to note High Technology Business Houses like software Industries, which almost work on 24x7, 365 day basis, have fully realized the energy saving potential of LED luminaires. Your company succeeded in enlisting the biggest software company of the country in the Customer list.

It is expected that this beginning will augur well in obtaining repeat orders from similar industries. Retrofits of existing luminaires aimed at energy savings are expected to take off in a big way-in addition to total adoption of LED Lighting technology for all new campuses.

Products developed for Rural applications like "Nano-Moon" and Solar Home Gen Sets for handling both AC and DC loads have been received very well by the prospective customers. This is a very encouraging sign because though these products are primarily designed for the rural segments of India, they will play a significant role even in semi-urban and urban parts of the country because of the severe shortages of power that are expected to be experienced by the Nation for several years to come.

Another niche area, which was expected to be a major market segment for your company is Coach lighting for Indian Railways. RDSO approval for the products was obtained as early as in the year 2009. The long wait of the company for orders, after the pioneering work done, will soon be over. The potential business opportunity for this product stream alone is expected to be in excess of Rs.500 Cr. in the next 4-5 years.

True Colour LED Displays

On the Display front, your company is continuing to receive repeat orders from the U.S based Colorado Time Systems (CTS), on a steady basis. This is certainly an index of the customer confidence on your company and the quality of its products. Your company will be exporting its 200th Screen to USA alone during this quarter.

Business opportunities from Indian Railways for the Passenger Information System Displays are also expected to pick-up rapidly as the Railway authorities have completed the selection criteria, in terms of modified specifications aimed at cost reduction and increasing the sources of supply for future additions of Displays in different Railway stations of the country. As in the case of coach lighting products, your company, so far, has been the only company to have received RDSO approval for the Railway Passenger Information Display Systems. Ironically your company's unique strength has become its weakness in so far as business is concerned. This issue also will be resolved in the coming few months and your company expects receipt of sizeable business from this segment very soon.

Product Development and innovation are the core strengths of your company. The feedback obtained from the users and channel partners being retained for promoting the lighting products has been very gratifying. There is un-qualified praise for the quality of your company's products and the consensus is that they compare very favourably with the best in the world in terms of performance and price.

To further improve and strengthen the quality, scope and elegance of your company's products, technical and business partnerships have been worked out with a couple of reputed foreign companies. To gear up for the supply of low-pitch-high resolution next generation LED Display products, an alliance is formed with M/s. Schenzhen Leyard Opto-electronic Co., Ltd, China. A joint venture 'Luxtronics' is formed with the Malaysian Company 'Kenplus' for carrying out mechanical designs and also to help MIC in the marketing of LED lighting products. These measures are expected to provide definite competitive advantages to your company.

It is on this core strength that your company plans to leverage on in its growth plans. Associations are being forged with partners for Marketing your company's products and carrying out Field operations. Beginnings made in this direction are showing very encouraging signs both in the Display and Lighting segments.

In respect of the cash-flow management and funds availability, to cater to the market demand being generated for your company's products and to support the growth plans being targeted, efforts are being made to mobilize additional equity and floating of convertible debentures. There is

considerable progress in this regard and there are encouraging signals from National and International sources. Further, the business models being drawn-up, with the help of the channel partners envisage collection of sizeable advances from Customers / Distributors to meet the working capital needs. I am happy to inform you that there are positive signals in this respect also mainly because of the strength of your company's products and the demand for them.

Notwithstanding all the problems experienced in the last 2-3 years, I feel very confident that your company will realise its full potential much sooner than later. Towards this end, the company's strategy will be to fully leverage on its core strengths namely Product Development, Product Customisation and Innovation in offering solutions for different customer applications.

I extend my grateful thanks to all the shareholders of the company for the trust reposed and the patience exhibited during the difficult times that the company has been passing through. I would like to reassure the share holder family that the days of struggle will be over and we will be on the path of growth and prosperity very soon. This confidence of mine stems from the fact that the business areas we are in offer tremendous growth opportunities and the products that we have are world class.

I look forward to your continued support and patronage and I reiterate my sense of gratitude to you all.

With Best Wishes

Dr. M.V. Ramana Rao

EXPLANATION FOR QUALIFICATIONS AS PER AUDITOR'S REPORT:

S.No.	Basis for Qualified Opinion	Explanation
1.	Reference is invited to Note 3.16 of the financial statements, the Company's Trade Receivables to the extent of Rs 63.26 crores are more than three years old and "we are unable to ascertain whether such balances as at balance sheet date are fully recoverable. Accordingly, we are unable to ascertain the impact, if any, that may arise in case any of these receivables are subsequently determined to be doubtful of recovery. Had the Company provided provision for the same, the loss for the period would have been higher by the said amount."	Due to the prevailing recessionary trend in the industry in the last 3 to 4 years, significant portion of trade receivables remain uncollected. The management has setup a separate team for close monitoring and collection of such overdue receivables. The management is confident of collecting such overdue trade receivables over a period of time and hence no provision has been made.
2. The Management challenges to be addressed by the company, to achieve the growth rates and levels of business required to ensure a respectable status in the market place, can be categorised as: (1) Sustaining the leadership status in Product Development and Innovation in the areas of LED Displays and Lighting Products (2) Market Penetration and Rapid Business Development (3) Ensuring the availability of necessary manufacturing and testing capacities to cater to the targeted business levels (4) Creation of the Supply and Distribution Channels across the Country to fully exploit the tremendous business opportunities that the company's products offer (5) Ensuring that the performance levels of the product groups in the field are as desired and most importantly (6) Mobilisation of the required Funds and bringing about the needed Financial Discipline for ensuring a satisfactory cash flow situation for supporting the targeted growth levels.

Considering the difficult times that the company has been going through, meeting these challenges, though daunting, is mandatory and vital. With determined efforts the challenges should be and can be met.

1. Leadership status in product Development

The pioneering work done for more than two & half decades in the field of LED Displays has enabled the company to reach a position of eminence in this product range not only in the country but also across the globe. MIC could find a position in the top 15 companies in the world in terms of capability for development and manufacture of high quality True Colour LED Displays. Several variants of these products were developed for deployment both in Indoor and Outdoor applications. MIC has come out with Display screens with pitch sizes of 40mm, 25mm, 21mm, 16mm, 14mm and 12mm for Outdoor applications. For Indoor applications the company has developed so far 12mm, 9mm, 7mm, 6mm, 4mm and 3mm screens. These products have been in use in and outside the country for applications covering Entertainment, Event coverage, Sports, Product advertisements, Theatre applications, Highway messaging, and mass communications. In addition, MIC could also develop special niche products for use by the Indian Railways for Passenger Information, Coach Guidance and Platform Display applications.

MIC has been the only company in the country, till date, for developing such sophisticated display systems. In respect of product range, these displays are considered adequate to cover all the application segments outlined above. However, the company has to focus on enhancing the application potential of the products already developed, by carrying out marginal additions in hardware and software to cater to the

needs of Education and Training, Information dissemination relevant to Rural areas, Mass communications with interactive features and Support systems for disaster management etc. The potential of the day light visible LED Displays with excellent True Colour features needs to be fully exploited.

Further, in order to enhance the scope of applications of these displays in High end applications like in control room and security domains, work needs to be carried out for realizing low pitch and future generation display systems for increased resolution and Indoor usage from short distances. Technological partnerships may have to be built towards this end.

In respect of the lighting segment, a plethora of products was developed by the company for Grid based, Off-grid based and Solar powered applications. Considering the highly competitive situation in the market place and considering the resource constraints that the company suffers from, it is necessary that very careful product rationalization has to be carried out for retaining market leadership in chosen application segments. The choice, obviously, has to centre around provenness of the products, established and envisaged market demand and targeted customer population. Since the elegance and performance of the lighting products largely hinges on Mechanical design, Heat dissipation systems, and Power Supplies, appropriate help may have to be sought from competent design agencies working on similar products abroad. This is vital for ensuring long term reliable performance of the products which is meant to be the main selling point for LED Lighting.

Actions taken so far in this regard :

- i. Technical and Business relationship with M/s Shenzhen Leyard Opto-Electronics Co Ltd for LED Display products
- ii. Forming an association with M/s. Kenplus of Malaysia for Design and marketing of LED Lighting products

In the light of policy initiatives taken by the Department of Electronics and Information Technology (DeitY), whereby concrete encouragement is meant to be provided for indigenously developed products, the company needs to further strengthen its R&D capabilities and infrastructure as quickly as possible.

2. Market Penetration and Rapid Business Development

It needs to be recognised that, the company's real core strengths are Product Development and Innovation. In respect of niche products for select single customers, like in the case of Railway applications, centralised corporate selling may prove adequate and effective since such selling is more technical selling than commercial selling. Similar is the

situation in respect of very high end usage of Displays like in the Nautanki Kingdom of Dreams - theater application which is a one off project for a unique requirement.

In order to meet the requirements of broad based and geographically dispersed clientele for both Display and Lighting segments, structured relationships need to be forged with specialists in the field who have the required resources and reach.

Actions taken so far in this regard :

- i. Business Association with Colorado Timing Systems (CTS) of U.S.A for LED Display Products
- ii. Business Association with SMIC360 for promotion of Display Products for Sporting applications
- iii. Business Association with IMEC for promotion of LED Lighting Products
- iv. Business Association with Energy Efficiency Services Limited (EESL) for joint project execution.

It is fully recognised that lot more needs to be done in this area for both Display and Lighting products. Supply of the products on OEM basis to companies with established marketing strengths has to be seriously pursued.

3. Note on Operations for 2012-13:

During 2012-13 (9 months) MIC has incurred an operating loss of Rs. 7.48 cr. due to significant reduction in turnover/ low level of operations. Where as fixed costs (including finance cost) could not be reduced commensurate with low level of operations.

Turnover of Rs.131.88 cr. during 2011-12 represents for 15 months period from 01.07.2011 to 30.09.2012. Whereas Rs.70.20 cr. during 2012-13 represents for 9 months period only from 01.10.2012 to 30.06.2013. Due to discontinuation of telecom business along with software division, there was no revenue generation from these divisions which resulted in decline in revenue. Further due to the prevailing recessionary trend, as you are aware, all the manufacturing industries have been effected during the last two years. This also causes reduction in turnover.

4. Ensuring availability of necessary manufacturing and testing capacities

It is expected that the available manufacturing and testing facilities will prove adequate for the coming two years, with appropriate usage of external centralised facilities especially for qualification and type approval purposes.

However, the incentives being offered by the Government of India in respect of investments on creation of infrastructure for Electronic Hardware Manufacture have to be taken

advantage of as soon as possible when the situation permits for the company.

Hopefully, this can be done in the course of the next two years

5. Creation of the Supply and Distribution Channels across the Country

This issue is partially covered in respect of Point 2 above.

6. Field Performance Monitoring of the Products

The existing system for the purpose, admittedly, is inadequate and needs to be strengthened and made effective very soon. The Channel Partners being put in position are expected to give valuable feedback in this regard. Retaining the services of third party performance auditors is also being considered for the purpose. This activity is recognised as very important for the company as it aims to solely leverage on its product strength and performance for its business opportunities.

7. Fund Mobilisation for supporting the targeted growth

This task, at this point of time, is the most vital one to address. Thankfully, considering the strength of our products, some business and channel partners are catering to the company's working capital requirements with advances against purchase orders. Bill discounting facilities being offered by some agencies are also being made use of. However, these measures alone will not be adequate to support the growth being targeted.

Infusion of additional equity through appropriate routes needs to be worked for. Efforts are on in this regard.

Considering the unpleasant experiences suffered in the past, the company needs to exercise great caution and diligence in the choice of its customers and compliance with legal and commercial issues.

To sum up, the company needs to continuously carry out very objective SWOT analysis and initiate the required mid course corrections as warranted to exploit the opportunities and to counter the threats. It needs essentially to operate leveraging its areas of strength - namely product strengths.
